

Testimonial

Having grown up in London, nowhere near the sea, boats were probably the last thing on my mind. However when we bought our second home in Mallorca (Illetas), and I sat watching all kind of boats going backwards and forward across the Bay of Palma, I thought I would like to give it a try.

After lots of research and an ICC training course with our two sons in Southampton, in 2006 I finally bought Axel 2, a 26ft motor boat (I have recently upgraded to Nemo, a 30ft overnight sports cruiser). The next decision was “where to keep it and who should maintain it for me”? I decided that the best location for me was the Club de Mar in Palma and it was suggested that I speak with Carlos at Motonautica Vert & Vert regarding maintenance and winter storage as their offices are right there, within the Club de Mar.

That was some four years ago and I could honestly not be happier with my choices of location and “partner”. Carlos, his father Arturo (who has run the company for some 40 years!!), Manuela, Carolina and ALL the staff at their storage facility in C,an Valero definitely have the interests of Nemo, myself and all their clients at heart.

Having built up, run (for 21 years), and then sold a travel business selling long-haul holidays I have learnt that, in life, “you get what you pay for” and, although Motonautica Vert & Vert are not the cheapest on the market, it is far more important for me to work with someone I trust and, are genuinely nice people.

Therefore I would, without any hesitation at all, thoroughly recommend Carlos and his team to any prospective client.
